SRSRoot Making Root Easy

About SRSRoot

SRS-Root is an easy to use solution for rooting your android device, the software contains multiple exploits to gain root access on your device.

- SRSRoot Supports Android versions 1.5, 2.1, 2.2, 2.3, 3.1, 3.2, 4.0, 4.1, 4.2
- We can Root latest models like Samsung Galaxy S2 / S3, Note / Note2 etc
- We have an Option to remove root from your device by one-click.
- Powered by SRS Server *Safe Rooting without flashing your device*

Why Root

Let's start with why you would want to root your Android smartphone. Sometimes apps require special permission that the Android OS, which is based on Linux doesn't allow. These could be simple as taking a screenshot to higher level permissions to the core Android files. Rooting makes your phone faster, increases battery life, allows it to run more apps, custom software and ROMs which allow complete control over every aspect of your device by allowing superuser and admin level permission. Removing carrier bloatware is a particularly enticing application.
