The application makes use of a self-adapting user interface which automatically adjusts to the computer model and to the version of OS X you are running.

The features are controlled via a single window which allows you to use the application as a general toolbox and First Aid assistant.. TinkerTool System is a collection of system utility features helping you in performing advanced administration tasks on Apple Macintosh computers.. All options available in the current situation are accessible via “panes”, very similar to the techniques you already know from the System Preferences application.
